

Elisabeth (Elsje) Slothower

Software Engineer & Implementation Consultant

Seattle, WA (Relocating) • contact@elsje.codes • github.com/elsjeslothower • linkedin.com/in/elsje-slothower • (253) 509-8262

SUMMARY

Software engineer and implementation consultant with experience spanning full-stack development (React, JavaScript, C#, Python, SQL) and client-facing solution delivery, including on-site enterprise deployments for municipal government agencies. Equally comfortable writing and testing code and training the end users who rely on it.

SKILLS

JavaScript • React • C# • SQL • API Development • Object-Oriented Programming (OOP) • Client Implementation & Training • Stakeholder Management • Requirements Gathering • Consulting • Agile/Scrum • Problem Solving • Cross-Functional Collaboration • Technical Documentation

EXPERIENCE

Software Implementation Consultant

Apr 2024 – Present

Fast Enterprises, Salem, OR

- Led on-site technical deployment and configuration for two enterprise software installations serving municipal government agencies (Unemployment Insurance, Driver & Vehicle Services).
- Trained client end users on configuration and reporting features through hands-on workshops and documentation.
- Diagnosed and resolved production issues, reducing known errors from over 2,000 to under 100.
- Built post-implementation support documentation and triage procedures that shortened incident handoffs to support teams.

Software Engineer Intern

Mar 2023 – Aug 2023

Skytap, Remote, US

- Migrated the connectivity checker page from Backbone.js MVC to React client-side rendering.
- Conducted code reviews and created pull requests; spun up flex stacks using Docker, Jenkins, and the CLI.
- Active participant in daily standups and bi-weekly Agile/Scrum sprints, helping cut task rollover to under 10%.

Software Engineering Apprentice

Sep 2022 – Jul 2023

Ada Developers Academy, Seattle, WA

- Completed a highly competitive (8% acceptance rate) software engineering apprenticeship covering Python, object-oriented programming, Big O notation, and relational databases, alongside team-based project delivery.
- Built capstone project “Pantry Pickings,” a virtual pantry app that suggests meals from existing ingredients to reduce food waste; earned certification in web development.

EDUCATION

Bachelor's of Arts in Communication

Sep 2018 – Dec 2021
University of Washington–Seattle, Seattle, WA

Concentration in Journalism. Minor in music. Published in multiple Seattle magazines. Dean's List, majority of quarters attended.

LEADERSHIP & ACTIVITIES

Committee Member, Fast for All — Employee resource group at Fast Enterprises focused on equitable benefits and biannual company-wide volunteer programs.

Volunteer Web Developer, Purls of Love — Built a pro bono website (Next.js, TypeScript, Tailwind CSS) for a volunteer-run nonprofit providing knitted and crocheted items to NICU families and shelters, including a donation page and free pattern library.
